

CREATIVE TECHNOLOGIES

Full Stack Developer (focus web/mobile)

Köln Hamburg

We are looking for a friendly, creative native digital to enrich our team in the area of creative coding. You'll be in charge of front- and backend development of interactive projects, technical research, and conception, but foremost pushing interaction and web technologies together with a very skilled and passionate team of artists, designers and developers forward.

You'll have the chance to bring in your own ideas and not only develop websites, but interactive experiences of all sorts. You have the chance to work in an international team, who all share the same goal of creating the best possible experience.

We don't believe that everybody who applies needs to check all checkboxes, because we know that great developers are great learners. To give you some orientation though, here are some technologies that we use in our projects:

- React.js (both web and native)
- Redux, Zustand, React Query
- Typescript, Javascript, Python
- Styled components
- Three.js, React-Three-Fiber, WebGL
- Next.js, Express, Django
- PostgreSQL, Redis
- Kubernetes; AWS (including Lambda), GCP and Azure
- 8th-wall, Twilio, Strapi
- Jest, Eslint

We are looking for somebody, with:

- 3 or more years of experience in web development
- full stack skills (frontend and backend)
- a strong sense of quality and craftsmanship
- ability to self-manage projects and work within deadlines
- curiosity to learning new technologies, as well as sharing ideas and collaborating
- ability to work in a team but also take the lead on a project from idea to deployment
